GitHub: <https://github.com/aguirregonzaloa>

JOB EXPERIENCES:

- I worked in a company called 4R Soluciones for more than 3 months as a FrontEnd Developer in 2021. In my first month, I built a web application with ReactJS (useState, useEffect and Context Hook) and used the preprocess sass to style it. After that, I have been learning Wordpress for 2 months and working on a project that was already created by another coworker but I had to improve some design style issues in desktop and mobile.

PROJECTS:

Reactjs Project with Comunidad de Programadores: [DEMO](#)

I participated in a challenge with a group of people from different Latinamerica countries. We were beginners at the moment in Reactjs library and we had to follow some tasks or features that the community gave us and complete it successfully to be allowed to win a prize. More info (<https://www.comfeco.com>).

Angular Sportsapp E-commerce: [DEMO](#)

Simulating an e-commerce website using Angular 9 (TypeScript). Applying concepts as reactiveX/RxJS (Observables, Subject, BehaviorSubject, etc). Interactive with a Laravel API Rest.

ToDoList: [DEMO](#)

Applied basic concepts of setting webpack and babel, DOM manipulation, some CSS and responsive design. Fetch data from a Laravel API Rest and also push new data to it.

Blog-laravel: [DEMO](#)

It is a basic blog using PHP Laravel framework. Following the guideline of an instructor from laracasts.com.
